

Name: Nidhi Patil
Cybersecurity Intern

Task 3:
Threat Classification Table

Threat	Target	Impact	Prevention
Phishing	Users, email accounts	Credential theft, financial loss	Check links and sender, use MFA
Malware	Computers, devices	Data theft, system damage	Use antivirus and update software
Ransomware	Files, computers	Data encryption, financial loss	Keep backups, avoid suspicious files
Social Engineering	Individuals, employees	Information theft, unauthorized access	Verify requests, don't share sensitive information
Credential Theft	User accounts	Account takeover, data theft	Strong password and MFA

Interview Questions

1. What is phishing?

Phishing is an attack where criminals use fake messages or websites to steal sensitive information.

2. What is ransomware?

Ransomware is malware that locks or encrypts data and demands payment.

3. What is social engineering?

Social engineering is manipulating people into revealing information or performing unsafe actions.
